Procedure

Setting up WebsiteBuilder

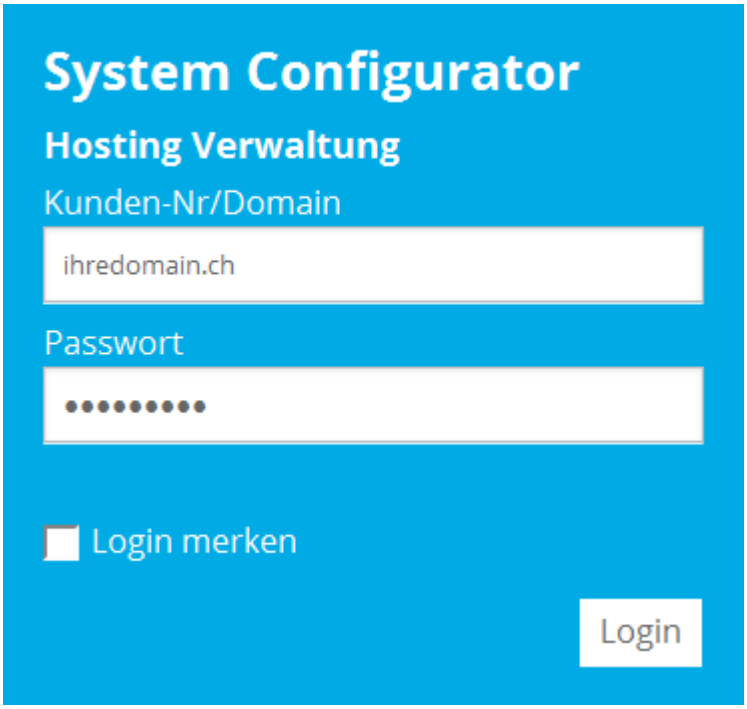
Publish website

Procedure

If you already use the website creator, please proceed as follows to perform a change to our successor WebsiteBuilder.

Setting up WebsiteBuilder

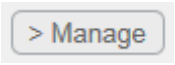
1 Login to the System Configurator with your customer or domain data on our website.



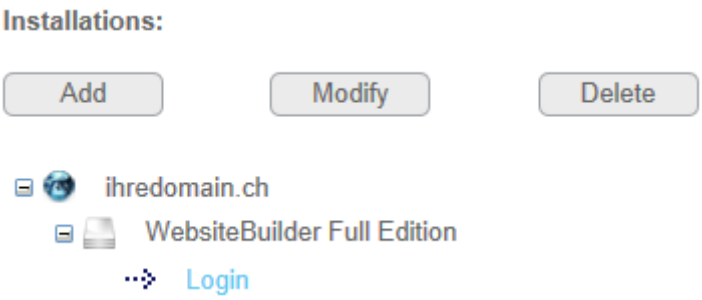
Note: If you log in with your customer data, continue with step 2. If you log in with your domain data, skip the next two points and continue with step 4.

2 Click on **Manage Hosting(s)**.

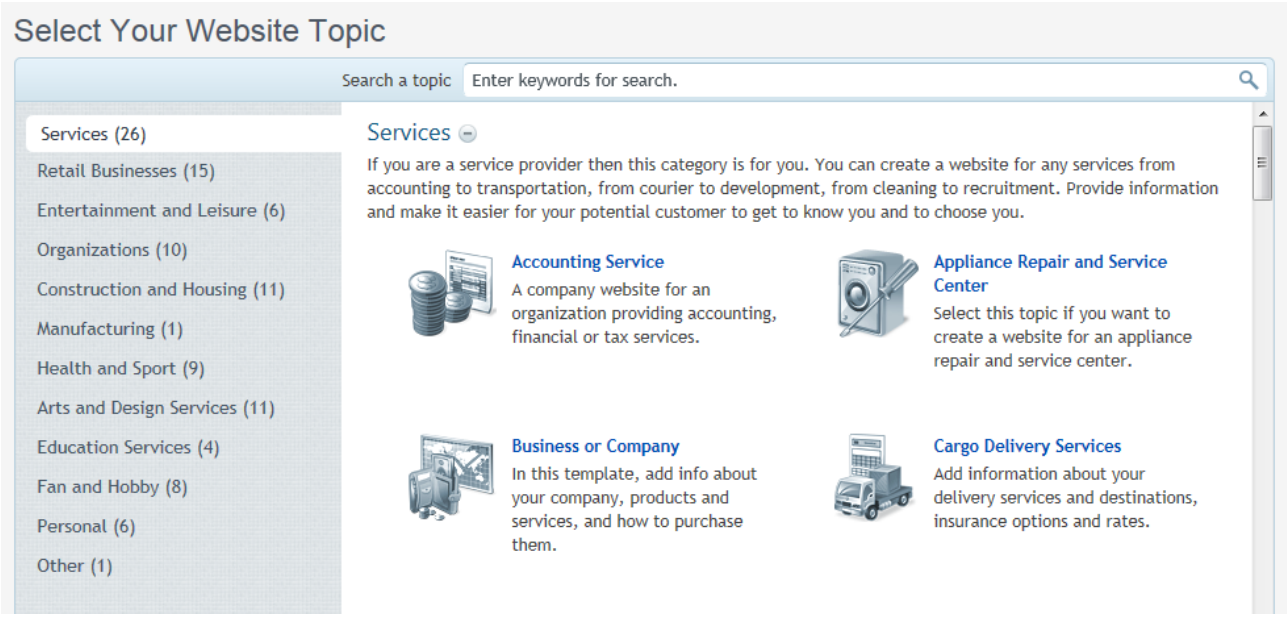
3 Click on **Manage**.



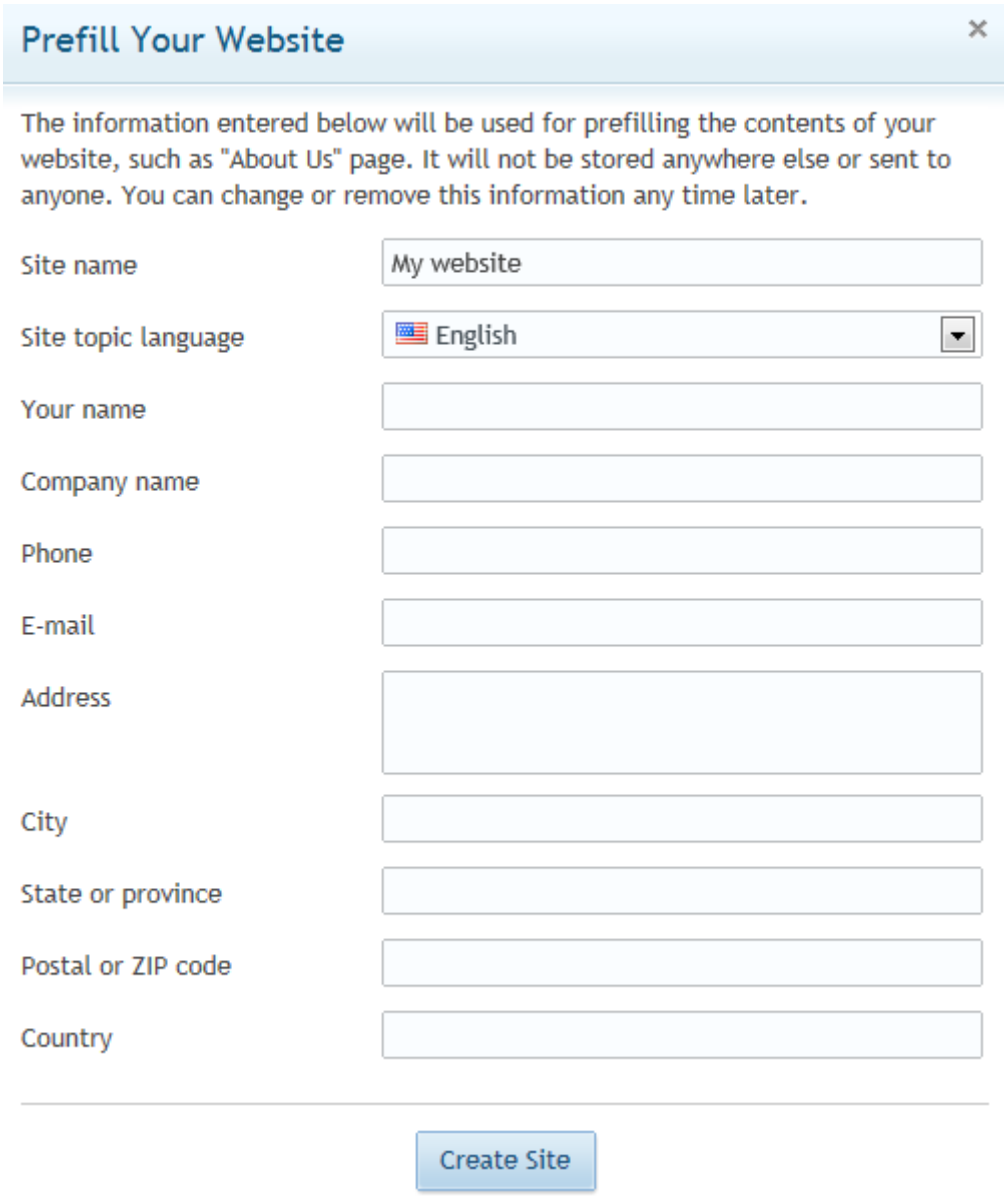
4 Click on **Login**.



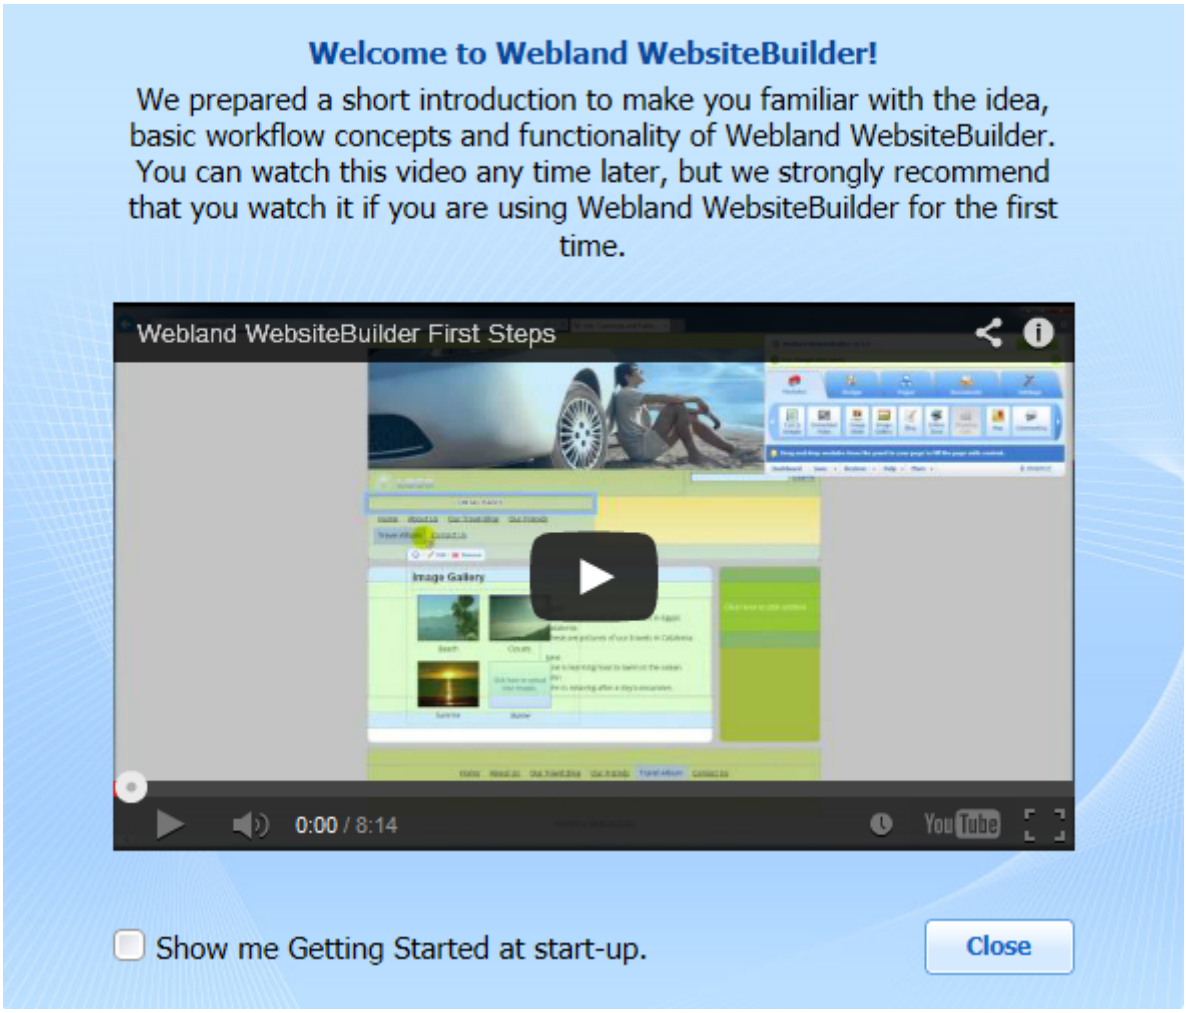
5 Select your website topic.



6 Enter your details below and select **Create Site**.

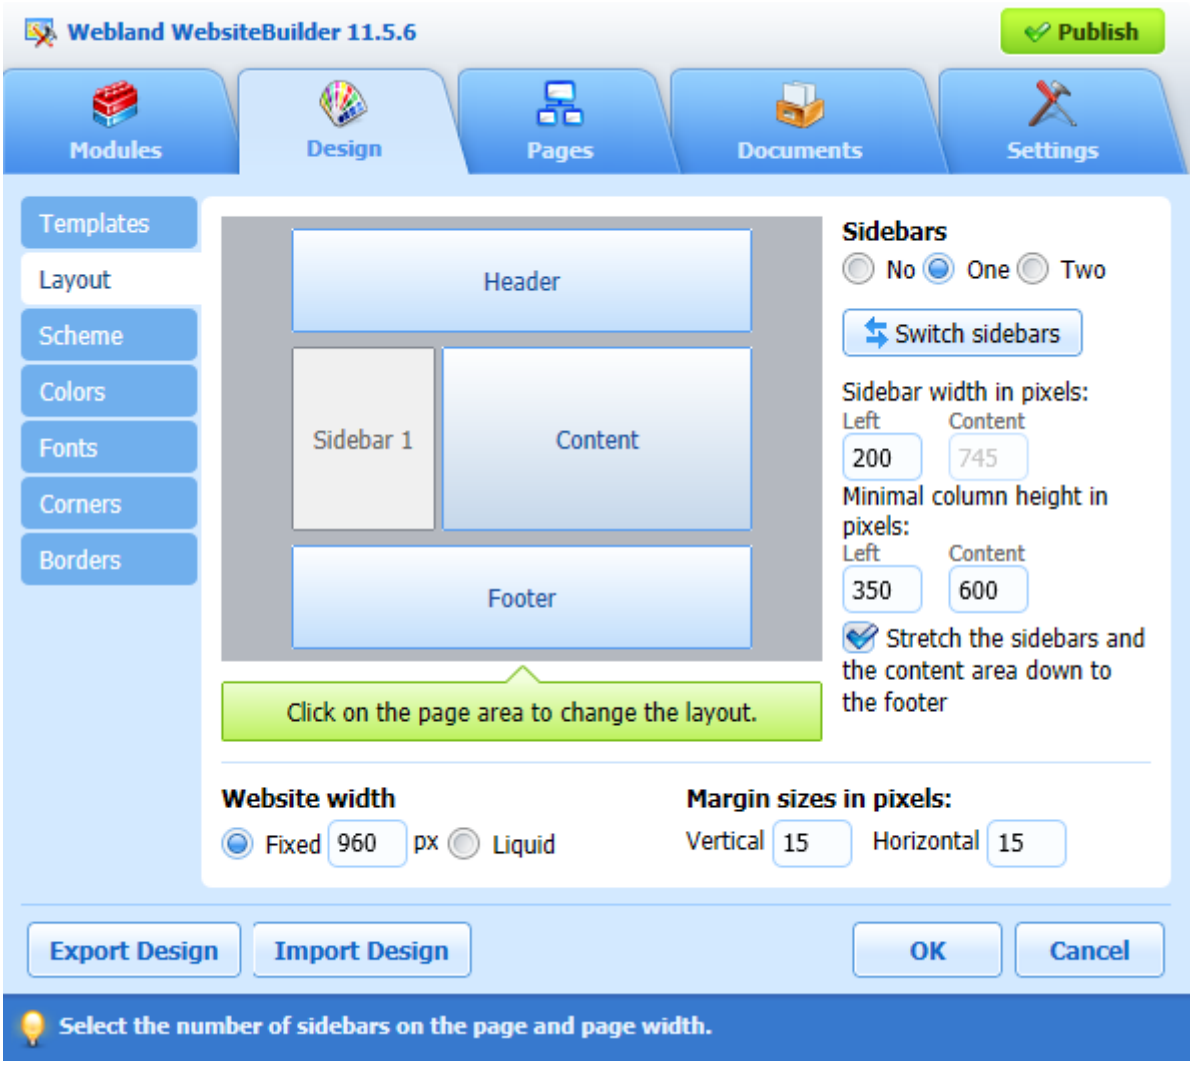


7 You can now watch the video tutorial.

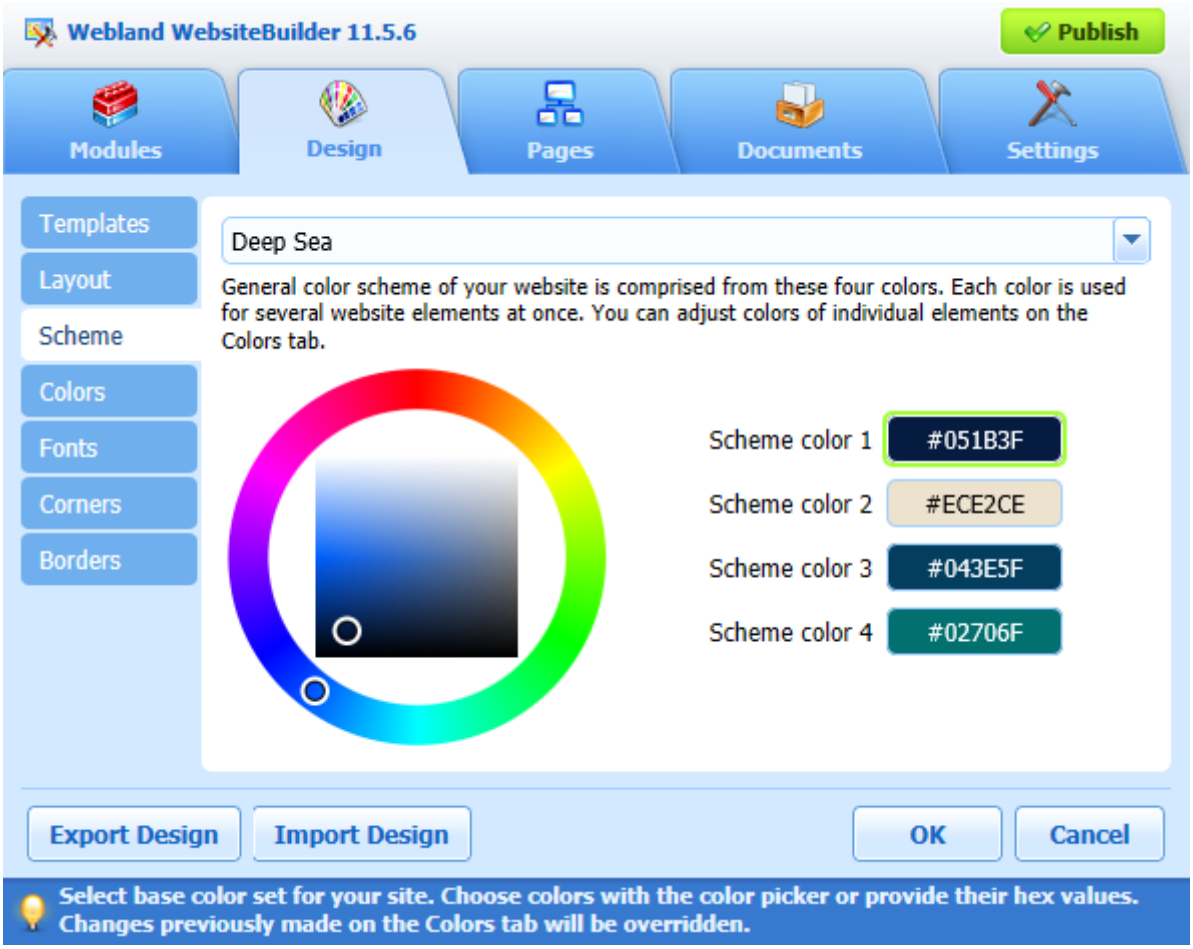


8 Select a design template.

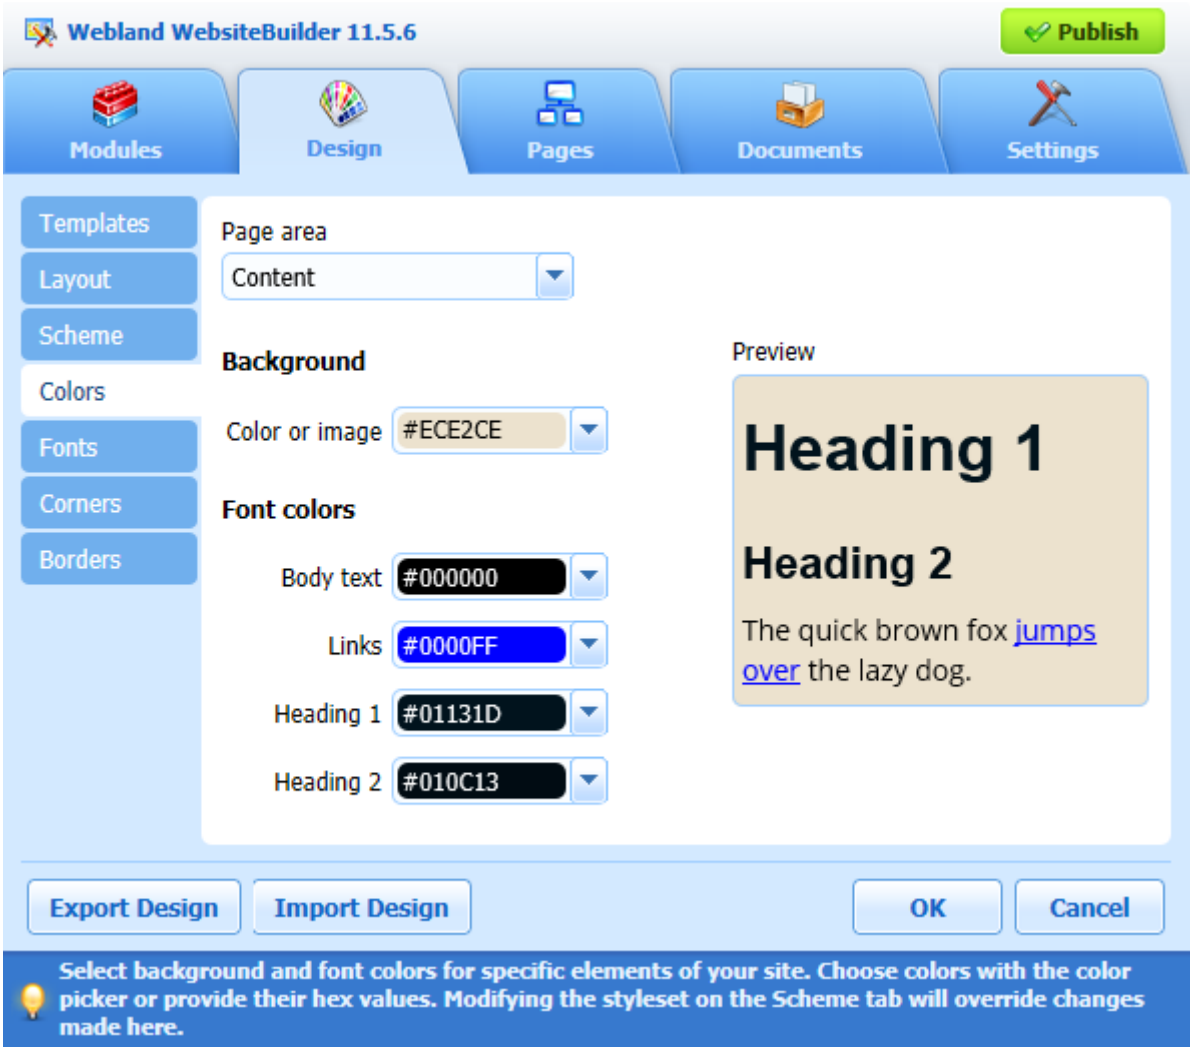
9 Select **Layout** and customize it to your liking.



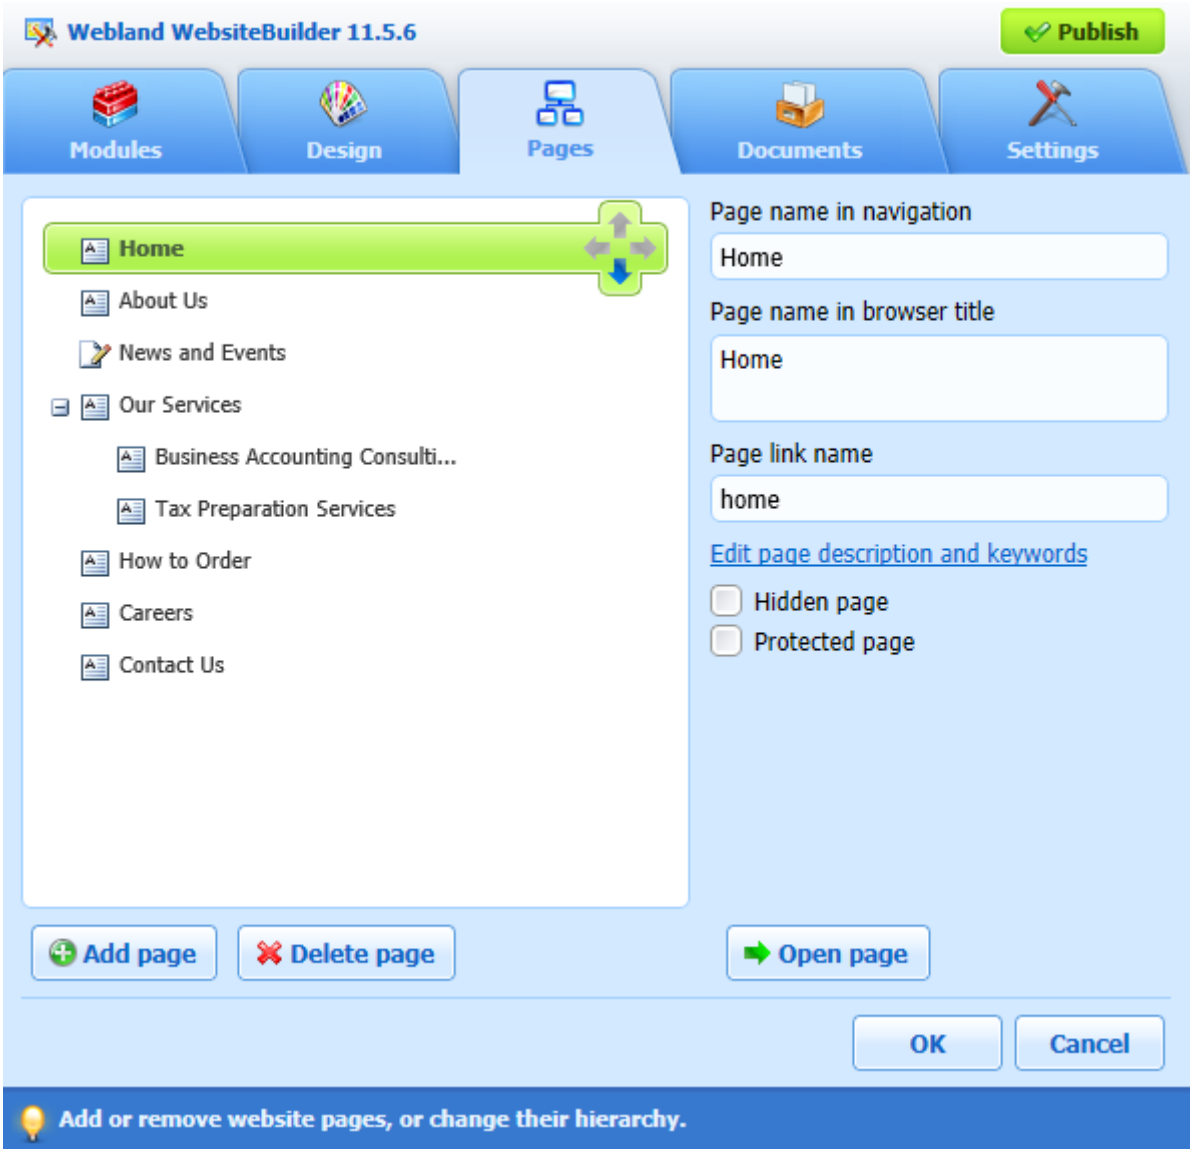
10 Select **Scheme**, select a color scheme or define your own color schemes.



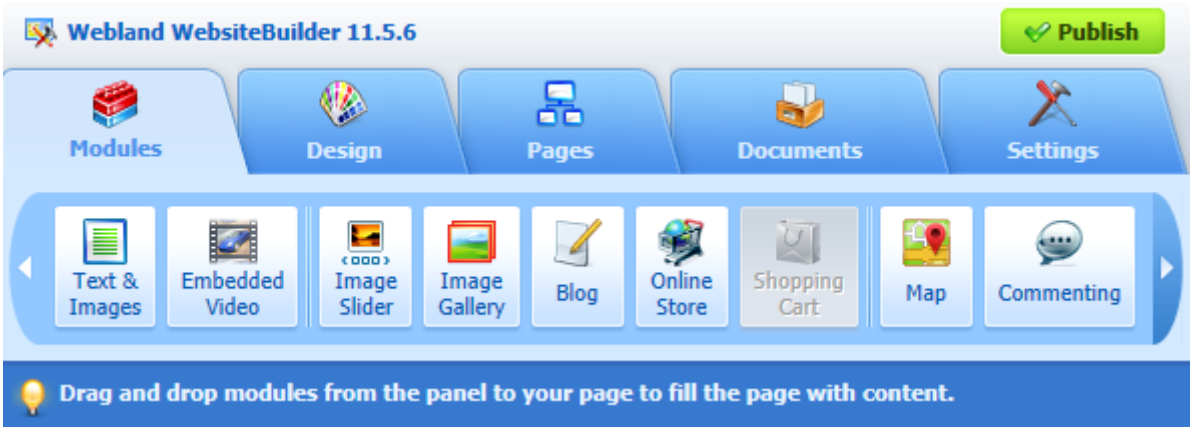
11 In addition, you can manage colors, fonts, corners and borders for your design.



12 Select **Pages** to edit the predefined pages, delete and add new pages. Use the arrow keys to change the position and the level of the selected page.

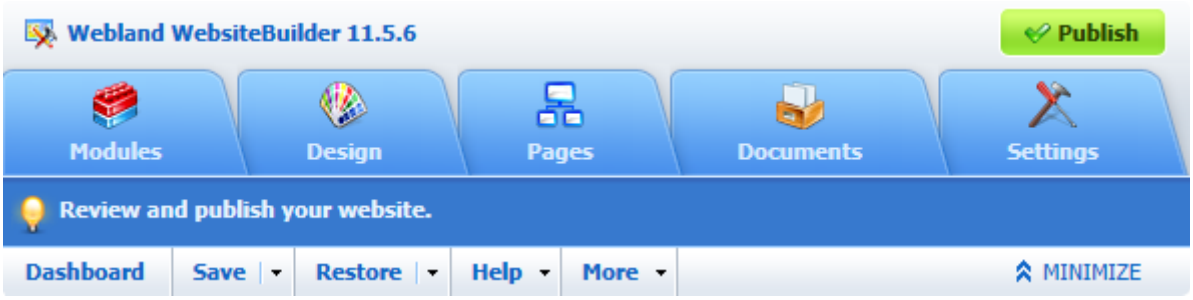


13 Select **Modules**. Drag the desired modules out of the window to the desired place on your website and lay on your side (drag & drop).



Publish website

1 In the main Menu, select the **Publish** function.



2 Your website was successfully published in your defined publish path. You can call your website directly via the link displayed in the main menu (e.g. http://www.yourdomain.ch/).
