Content

Procedure

Setting up WebsiteBuilder Transfer existing data

Publish website

Procedure

If you already use the website creator, please proceed as follows to perform a change to our successor WebsiteBuilder.

Setting up WebsiteBuilder

1 Login to the System Configurator with your customer or domain data on our <u>website</u>.

Note: If you log in with your customer data, continue with step 2. If you log in with your domain data, skip the next two points and continue with step 4.

2 Click on **Manage Hosting(s)**.

3 Click on Manage.

4 Click on **Applications**.

Applications

5 Click on **WebsiteBuilder**.

Applications
Website Builder
CMS Systems
Туро3
Joomla
DotNetNuke
E-Commerce
OS Commerce
Guestbook
Wordpress (Weblog)
phpBB (Forum)
DokuWiki (Wiki)

6 Click on **Add**.

Installations:

Ad	d Mod	fy	Delete
1	ihredomain.ch		

7 Select your desired version of WebsiteBuilder and specify the desired publish path. Note: If you use the WebsiteCreator in the root directory or in a subdirectory, make sure that you define a different subdirectory for the WebsiteBuilder (e.g. / wsb).

Install:

Please select the desired offer

Enter the desired publish path:

Eg: wsb for installation in the directory "/wsb". For an installation in the webroot you leave the field blank.

Install

Cancel

•

8 Click on **Install**.

Install:

WebsiteBuilder Full Edition - CHF 4.90/ month

Enter the desired publish path:

/wsb

Eg: wsb for installation in the directory "/wsb". For an installation in the webroot you leave the field blank.

Install

Cancel

9 Click on **Login**.

Installations:

10 Select your website topic.

	Search a topic Er	ter keywords for search.			Q
Services (26) Retail Businesses (15) Entertainment and Leisure (6) Organizations (10)	Services If you are a servaccounting to trand make it eas	vice provider then this category is for you. ransportation, from courier to developmer ier for your potential customer to get to k Accounting Service	You can creat nt, from cleanin now you and to	e a website for any services from ng to recruitment. Transfer existing data

If you have stored your data (text and images) locally, skip to point 3. Otherwise, proceed with point 1.

Start your site with your Internet browser
 (e.g. Internet Explorer, Mozilla Firefox, Google chrome or Opera).

2 Copy your data (text and images) of your site and save them locally. You can select text with the left mouse button, copy it with the right mouse button and the corresponding function (copy). Copy images with the right mouse button and the Save Image function.

3 Return to WebsiteBuilder. Now add your text and images to your new website.

4 Add text with the right mouse button and the Insert function directly in the page content.

¢	😨 Panel ausblenden	*	ntfernen OK Abbrechen	4					
Willkommen									
Wil alle ant	Ikommen auf der es Wissenswerte (fragen und Servic	offiz über es o	ellen Website von Max Mustermann, Künstler, Maler und Fotograf. Hier erfahren <u>Rückgängig</u> <u>Ausschneiden</u> <u>Ausschneiden</u>	ise ise					
¢	Body-Text Open Sans C	B 14 2013	Kopieren Einfügen Löschen						
			Google- <u>S</u> uche nach "Willkommen auf" <u>A</u> uswahl-Queltext anzeigen						
			Wörterbücher hinzufügen Element untersuchen (Q)						

5 Also add images in a page's content. Click with the left mouse button in the content page in which you want to insert the image and select the Image button.

6 Do not forget to regularly save your customizations to the site.

3 So that your new website (e.g. http://www.yourdomain.ch) appears when you call your domain, you have to switch your domain to the appropriate subdirectory via domain mapping (in the System Configurator). Select **Settings**.

Settings

4 Select **Domain Mappings**.

Domain Mappings

5 Select **Modify**.

Existing Domain-Mappings:

🛣 Modify

- Add Mapping
- 6 Enter your WebsiteBuilder directory (e.g. /wsb).

Modify Mapping:

Current domain mapping:

ihredomain.ch

Enter the destination URL of the mapping:

/wsb

E.g.:

- Leave blank for a mapping to the home page
- /abc for forwarding to the directory abc
- http://www.domain.ch for external forwarding

Save changes

Cancel

7 Your domain is now set on your WebsiteBuilder directory and you can call your new website via the internet browser (eg Internet Explorer, Mozilla Firefox, Google Chrome or Opera).

- 8 Note: If you have set up a LIMITED version, make sure please, not to exceed the limit of 6 pages, so that you can publish your website. If you want to use more than 6 pages, you need to <u>upgrade</u> the WebsiteBuilder on the FULL version.

Webland WebsiteBuilder 11.5.6 Suy and Publish						
() The limit on maximum number of website pages was exceeded. Created - 9, allowed - 6.
